

RITE-LOK™ Debonder/Skin Release AC68

Product Data Sheet

Updated : April 2007
Supersedes : New

Product Description RITE-LOK AC68 is a solvent- based liquid formulated for the removal of RITE-LOK cyanoacrylate adhesives. RITE-LOK AC68 is used to clean areas of uncured adhesive, to remove small areas of cured material and over time will soften thick portions of cured material. AC68 is also suitable for debonding skin but should not be used to debond eyelids or lips.

Product Use All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable the user's method or application.

Note Values presented have been determined by standard test methods and are average values not to be used for specification purposes.
Our recommendations on the use of our products are based on tests believed to be reliable but we would ask that you conduct your own tests to determine their suitability for your applications. This is because 3M cannot accept any responsibility or liability direct or consequential for loss or damage caused as a result of our recommendation
