

REACH Compliance

In 2007 the REACH Regulation (Registration, Evaluation, Authorization and Restriction of Chemicals) 1907/2006/EC entered into force. The purpose of REACH is to streamline and improve the former legislative framework regarding chemicals in the European Union (EU). For more information on the REACH requirements and responsibilities, visit the European Chemicals Agency (ECHA) website at http://guidance.echa.europa.eu/about_reach_en.htm.

LORD is fully committed to meeting its legal obligations with regard to REACH compliance. At this time we have an active and robust REACH compliance program in place. LORD is taking the following steps to ensure compliance with REACH:

- LORD is working closely with its suppliers to ensure that registration of raw material substances is completed and to ensure that those raw materials are available for use in the EU.
- LORD Germany GmbH is the appointed Only Representative (OR) for LORD Corporation.
- LORD has pre-registered the required chemical substances that it imports into or manufactures in the EU.
- LORD is currently participating in the Substance Information Exchange Forum (SIEF) for each pre-registered chemical substance in order to complete required registration in a timely fashion.
- LORD is responding to customer inquiries regarding REACH Compliance of LORD and its products. LORD will continue to work with its customers to validate that the customer uses and applications are properly addressed.
- LORD will continue to monitor and respond to all facets of REACH and to meet applicable requirements within the timelines set by REACH legislation.

If you need further information, please contact the following individuals for any REACH-related matters.

In the EU
